Web Application Development
Assignment 1

UnemployedNot Job Portal Website

Saeed Ur Rehman
BCS233057

Home Page
This is the main landing page of the UnemployedNot job portal. It contains a welcome message introducing the website, a list of features using an unordered list, job categories organized using headings from h1 to h3, a how it works section using an ordered list, and a few featured job listings with apply now links. The page uses tags like header, nav, main, section and footer.

Jobs Page
This page displays all available job listings organized by category. Categories include Technology, Engineering, Medical and Healthcare, Education and Teaching, Business and Finance, Media and Content, and Marketing. Each job listing shows the company name, location, job type, experience required and a short description. Users can click the Apply Now link which redirects them to the signup page.

Sign Up Page
This page allows new users to create an account on UnemployedNot. The form includes different input types such as text for name and phone, email for email address, password for creating a password, radio buttons for selecting account type (Job Seeker or Employer), checkboxes for selecting skills, a file input for uploading a resume, and a date input for date of birth. A terms and conditions checkbox is also included before the submit button.

Login Page
This is a simple login page where existing users can sign in to their account. The form contains an email input, a password input, and a remember me checkbox. A link is also provided for users who want to reset their password and another link to redirect new users to the signup page.

Contact Page
This page provides contact information for UnemployedNot including email, phone number and address. It also contains a contact form where users can send a message. The form includes text input for name, email input, text input for subject, and a textarea for the message. All pages are linked together through a common navigation bar present on every page.
